SUMMARY

A fullstack software engineer with 2+ year experience. More than 1 year for mobile developer using kotlin. I build modern, reactive, and user-friendly website & mobile applications using the latest technologies. I Believe a perfect blend of UI architecture is one, where the goals and needs are accounted for in an elegant, efficient, and robust design of the UI. I also try to contribute through writing articles and tutorials on medium @posann and YouTube @codelebes.

SKILLS

Frontend Developer (Intermediate): Javascript, React, Next, Redux/Zustand, Chakra-UI

Mobile Developer (Intermediate): Kotlin, Jetpack, RXJava/Koin, Mockito, Retrofit, RoamDB/SQLite

Backend Developer (Basic): PHP, Laravel, Codeigniter, Node, Express, Flask, Java, Jswing, Filament

Others: Linux, Figma, MongoDB, MySQL, Postman, Github, NPM, AWS

WORK EXPERIENCES

09/2022 – 04/2024 **Fullstack Developer & Instructor IT**

YBM PLN (PeTIK)

Build and develop official website PeTIK Jombang. I currently use laravel/express for backend and react/next.js for frontend. Using kotlin for mobile (android). I also have responsibilities as a instructor for web design, frontend developer (react), mobile development (kotlin) and database nosql (mongodb). Responsible for teaching 25 students for all courses.

10/2022 – 06/2023 **Android Learning Path**

Bangkit Academy Cohort

Learning android stack from beginner to expert phase, become a peer tutor mentor. Build and develop donasien app as final project.

05/2021 – 03/2022 **Web Developer**

Ardisi Rasya Herbalindo

Build and develop business system administration using php (laravel, livewire). I currently using wordpress and elementor to build jelly gamat website.

05/2019 – 12/2020 **Web Developer**

Pesantren Teknologi Informasi dan Komunikasi

Build and develop website applications using php with codeigniter 3 framework.
Also maintain desktop-based applications with java language using jswing.
