SUMMARY

A fullstack software engineer with 3+ year experience. More than 2 year for mobile developer using kotlin. Currently working full time as software engineer and programming lecturer at PeTIK Jombang. I build modern, reactive, and user-friendly website & mobile applications using the latest technologies. I Believe a perfect blend of UI architecture is one, where the goals and needs are accounted for in an elegant, efficient, and robust design of the UI.

WORK EXPERIENCES

05/2022 - Present — **Programming Lecturer**
PeTIK

Teaching web design, frontend (react), mobile development (kotlin) and database nosql (mongodb). Responsible for teaching 25 students for all courses.
